- Risk of pressure ulcer
- Risk of malnutrition
- Risk of bad oral health
- Risk of bladder dysfunction

In hospital, primary health care, nursing home etc

Care prevention
The relationship between the different risk areas

- Fall
- Pressure ulcer
- Malnutrition
A structured process

Fig. 1 The preventive care process for preventing adverse events by identifying risks at an early stage
Malnutrition risk in numbers according to Senior alert, 2017 - 2018

![Bar chart showing malnutrition risk in numbers for 2017 and 2018](chart.png)
The most common underlying causes for malnutrition, 2017-2018
The most common preventive actions for malnutrition, 2017
Conclusions:
The team needs to be more inter-professional including dietitians, physiotherapists, occupational therapists, and dental health

Trial registration: observational retrospective register-based study, using data from SA during 2015
The French National Food Council
The CNA in a nutshell

Created by in 1985, the «Conseil National de l’Alimentation»

Represent the main components of the food production chain

The Council *may be consulted on the definition of national food policy development*. It produces reports and recommendations

«parliament for food», the CNA develops a socioeconomic approach, encompassing the today’s professional environment as the consumers’ expectations and preferences.
The action of the CNA

In 2010, a Food Public Policy was introduced in the French Law, implemented through a CNA has issued **83 opinions**. The newest ones concern:

- School catering (2017);
- Food in hospital (2017);
- Food e-commerce (2018);
- Food and health (2018);
- Slaughterhouse ethics committee (2019);
- Work in progress concerns farming methods labelling and packaging.
